

Invites all Christchurch Dentists & Technicians to the CHRISTCHURCH STUDY GROUP MEETING

Friday 17<sup>th</sup> October 2025 at 7.00pm

Mr Anton Martin

Anton is a skilled dental technician originally from South Africa, now based in New Zealand. With a strong foundation in dental technology, Anton brings a meticulous eye for detail, craftsmanship, and a passion for creating high-quality prosthetics and restorative dental solutions.

Having trained and worked in South Africa before relocating, Anton has gained diverse experience in both traditional and digital dental lab environments. His work reflects a deep understanding of aesthetics, function, and the latest industry technologies.

Anton continues to apply his expertise in a local context, contributing to high standards of patient care and innovation in the dental field. Known for his professionalism and precision, Anton is a valued member of the dental community and is committed to ongoing learning and excellence in his craft.

NZACD Members complimentary

Non-Members - \$75 including gst discounted to \$55 if payment received prior to lecture date.

TOPIC:

Invitation to CAD/CAM Materials Evening – Elevate Your Chairside Dentistry

You're invited to an exclusive evening session designed to deepen your understanding of dental materials – specifically those used in CAD/CAM chairside systems or requested from your favourite laboratory. How to optimize their use in modern clinical practice.

What to Expect:

Gain practical insights into a range of cutting-edge materials:

- Zirconia ceramics: ideal for high-strength posterior restorations, offering excellent marginal integrity and minimal preparation.
- Lithium disilicate/glass ceramics: combining high aesthetics with strength for anterior crowns and veneers.
- Feldspathic and leucite-reinforced ceramics: perfect for highly aesthetic anterior restorations requiring a natural finish and polish ability.
- Hybrid material: ideal for replacement of general composite restorations.

Why Attend:

- Discover how to select materials based on clinical indications like strength, translucency, and bonding strategy.
- Learn efficient workflows: from intraoral scanning and digital design to chairside milling, sintering, and cementation – often in a single appointment.
- Explore recent innovations in multi-layered, high-translucency ceramics and zirconia for monolithic aesthetics.

Whether you're new to CAD/CAM or looking to refine your approach or having a deeper knowledge on what to request from your dental laboratory, this session will offer valuable strategies to enhance patient outcomes and practice efficiency.

All attendees must rsvp (for catering purposes) by Friday 10th October 2025 to admin@nzacd.co.nz or telephone 09 358 4647 No refund will be made for cancellations received less than 7 working days of the event. No refunds for "no-shows"
