Invites all Wellington Dentists & Technicians
to WELLINGTON STUDY GROUP MEETING
Friday 20 July 2018 at 6.30pm

Edmund Young studied at Otago University and completed his Dental degree in 1991.

He worked at Auckland Hospital and

Middlemore Dental Unit before practicing in private practice.

He has a Fellowship in Restorative Dentistry with a Royal Australian College of Dental Surgeons.

He currently practices general dentistry and cosmetic dentistry with a particular interest in new products and systems available in dentistry today.

2 HOURS VERIFIABLE CPD CREDITS

NZDA verifies, that based on the information provided to NZDA, this activity meets the Dental Council policy requirements for CPD.

NZDA CPD verification does not imply promotion or endorsement of the contents of any course. Attendees need to use professional judgment to assess the validity and usefulness of techniques, materials or therapeutic products to their own practice.

NZACD Members complimentary

Non Members - \$75 including gst
discounted to **\$55** if payment received
prior to lecture date.

PRESENTER:

Dr Edmund Young BSc, BDS (Otago) FRACDS

TOPIC: Cementation vs Bonding: A Modern Approach

Adhesive dentistry has translated indirect restorations to be less mechanically retentive and the design of our indirect restorative options has changed.

Since the design of our preparations has changed, we now have to create favourable situations for more predictable bonding to tooth structure.

A brief discussion on how new foundations for our restorative techniques will give us predictable results for our indirect restorations.

The use of Zirconia and Lithium disilicate and indirect resins are being used daily as an option to restore large areas of tooth structure that is missing. A brief guide on predictable and reliable techniques for indirect restorations will be discussed with some latest updates on bonding techniques.

LEARNING OUTCOMES:

The attendee will learn

- about the concept of immediate dentin sealing and the reasons why to implement this in their daily practice.
- when and how to cement with traditional materials.
- when to, how to, and why "bond" instead of cement whenever possible.
- how adhesive bonding focuses more on the clinical longevity and performance of the tooth than the restoration itself but also how it can outperform traditional cementation over time.

**All attendees must rsvp (for catering purposes by
Monday 16 July 2018 to admin@nzacd.co.nz
or telephone 09 358 4647**

The Wellington address to attend the Study Group is

**University of Otago Wellington
Wellington School of Medicine
Level D (Small Lecture Theatre)
23 Mein Street, Newtown, Wellington**
