

Invites all Auckland Dentists & Technicians to the
AUCKLAND STUDY GROUP MEETING

Tuesday 29th September 2020 at 7pm

Dr Edmund Young

Dr Edmund Young graduated from Otago University in 1991 and has been a member of the New Zealand Academy of Cosmetic Dentistry

since it was first founded. He continued further studies to complete a fellowship from the Royal Australia College of Dental Surgeons soon after.

Recently he has completed training as a Biomimetic dentist at the Alleman-Deliperi Training Centres in Utah and Sardinia, being personally trained by Dr David Alleman and Dr Simone Deliperi.

His clinic is focused on restorative techniques for minimally invasive dentistry and the use of the latest techniques for bonding restorations.

He is a member of the Academy of Biomimetic Dentistry and actively teaches techniques in Biomimetic Dentistry from his practice in Meadowbank in Auckland.

2 HOURS VERIFIABLE CPD CREDITS

NZDA verifies, that based on the information provided to NZDA, this activity meets the Dental Council policy requirements for CPD.

NZDA CPD verification does not imply promotion or endorsement of the contents of any course. Attendees need to use professional judgment to assess the validity and usefulness of techniques, materials or therapeutic products to their own practice.

NZACD Members complimentary

Non-Members - \$75 including gst discounted to **\$55** if payment received prior to lecture date.

PRESENTER:

DR EDMUND YOUNG

TOPIC:

The Good, the Bad and the Ugly - is it Zirconia?

Lecture Synopsis:

Crowns made of zirconia are becoming more common and they are more biocompatible for some patients. Like many of our dental materials there are advantages and disadvantages of this material. Now in 2020, situations where we wish to use a metal free indirect restoration are available. The laboratories are providing the material zirconia as an option in which dentist are taking the material to the limit. On all laboratory lab sheet forms and independent milling machines several zirconia options are available. A discussion on the latest materials associated with zirconia will be discussed in depth. There is good research to show the bonding of zirconia to tooth structure is now predictable. A discussion of the various brands available for bonding and cementing to zirconia will be presented.

Learning Outcomes:

Participants will gain knowledge on the various types of indirect zirconia materials on the market. A guideline on where to use certain types of zirconia, from anterior to posterior. The pitfalls of using indirect zirconia and problems with zirconia. Bonding or cementation of zirconia, when and where.

All attendees must rsvp (for catering purposes) by Tuesday 22nd September 2020 to admin@nzacd.co.nz or telephone 09 358 4647
No refund will be made for cancellations received less than 7 working days of the event. No refunds for "no-shows"
